Understanding the Foundations of Morrison 2013

Theoretical Background

Morrison's model of designing effective instruction is rooted in constructivist learning theories, which posit that learners actively construct knowledge through experiences and interactions with their environment. This perspective shifts the focus from passive reception of information to active engagement, emphasizing the importance of context, prior knowledge, and learner motivation in the learning process. Key theoretical influences include:

- Constructivism:** Learners build new knowledge based on existing mental schemas.
- Behaviorism:** Reinforcement and feedback shape learner behaviors.
- Cognitivism:** Emphasis on mental processes involved in learning, such as attention, memory, and problem-solving.

Morrison integrates these theories into a comprehensive framework that highlights the importance of designing instruction that is learner-centered, goal-oriented, and adaptable.

The Purpose of Morrison's Model
