Detailed Solutions for the 1981 Physics C Free Response Questions

Below, we present an in-depth analysis of select free response questions from the 1981 exam, illustrating problem-solving techniques and conceptual insights.

Question 1: Rotational Dynamics

Problem Summary: A uniform disk of mass (M) and radius (R) rolls without slipping down an inclined plane of angle (θ) . Determine the acceleration of the center of mass and the angular acceleration.

Official Response Summary: The solution involves applying energy conservation or Newton's second law for translation and rotation. The key is recognizing the no-slip condition links linear and angular accelerations.

Step-by-step Solution:

- Identify forces: Gravitational component along the incline: $(Mg \sin \theta)$ Normal force (N) , perpendicular to the incline Friction force (f) , static, acting at the point of contact
- Apply Newton's second law for translation: $[Mg \sin \theta - f = Ma]$ Apply rotational dynamics: $[\tau = I\alpha]$ where $(I = \frac{1}{2} MR^2)$ for a disk, and $(\tau = fR)$.
- No-slip condition: $[a = R\alpha]$
- Combine equations: $[fR = \frac{1}{2} MR^2 \times \frac{a}{R}] \rightarrow f = \frac{1}{2} Ma$
- Substitute (f) into translation equation: $[Mg \sin \theta - \frac{1}{2} Ma = Ma]$ $[Mg \sin \theta = \frac{3}{2} Ma]$
- Solve for (a) : $[a = \frac{2}{3} g \sin \theta]$
- Angular acceleration: $[\alpha = \frac{a}{R} = \frac{2}{3} \frac{g \sin \theta}{R}]$

Final Answer: $\boxed{a = \frac{2}{3} g \sin \theta}$ $\boxed{\alpha = \frac{2}{3} \frac{g \sin \theta}{R}}$

Key Takeaways: Utilize the no-slip condition to relate linear and angular quantities. Recognize the moment of inertia for the object. Carefully analyze forces and torques acting on the system.

Question 2: Electrostatics and Electric Fields

Problem Summary: A point charge (q) is located at a distance (r) from the center of a conducting sphere of radius (R) . Determine the electric field at a point outside the sphere, considering the sphere's induced charge distribution.

Official Response Summary: The solution

involves using the method of images or superposition to account for induced charges and then applying Coulomb's law.

Step-by-step Solution:

Understanding the physical situation: The conducting sphere is initially neutral. The point charge (q) induces a charge distribution on the sphere's surface.

Method of images: To solve for the potential outside the sphere, replace the sphere with an image charge (q') located inside the sphere at a certain position. The image charge magnitude and position are chosen such that the boundary condition (potential on the sphere's surface) is satisfied.

Determine the image charge: $[q' = -q \frac{R}{r}]$ positioned at a distance: $[r' = \frac{R^2}{r}]$ from the center, along the line connecting (q) and the sphere's center.

Potential outside the sphere: $[V(\mathbf{r}) = \frac{1}{4\pi\epsilon_0} \left(\frac{q}{|\mathbf{r} - \mathbf{r}_q|} + \frac{q'}{|\mathbf{r} - \mathbf{r}_{q'}|} \right)]$ where $(\mathbf{r}_q)$ and $(\mathbf{r}_{q'})$ are position vectors of the real and image charges.

Electric field at a point outside: $[\mathbf{E} = -\nabla V]$ which simplifies to the superposition of the Coulomb fields from both charges.

Result: For points outside the sphere (i.e., $(r > R)$), the electric field is equivalent to that due to a single point charge $(q_{\text{eff}} = q)$ located at the original charge's position, with the sphere's influence encapsulated in the image charge method.

Final expression for the electric field: $[\boxed{\mathbf{E}(\mathbf{r}) = \frac{1}{4\pi\epsilon_0} \left(\frac{q}{|\mathbf{r} - \mathbf{r}_q|^3} (\mathbf{r} - \mathbf{r}_q) + \frac{q'}{|\mathbf{r} - \mathbf{r}_{q'}|^3} (\mathbf{r} - \mathbf{r}_{q'}) \right)}]$

Key Takeaways: The method of images simplifies complex boundary value problems. Induced charges on conductors can be effectively modeled as image charges. Superposition principle is fundamental in electrostatics.

Winter of discontent a story about dunedin opposition to the 1981 springbok tour

winter of discontent a story about dunedin opposition to the 1981 springbok tour

The winter of 1981 remains one of the most tumultuous and defining periods in New Zealand's social and political history. Central to this unrest was the widespread opposition to the Springbok Tour, a series of rugby matches between New Zealand and South Africa, held during a time when apartheid South Africa's racial segregation policies sparked international condemnation. In Dunedin, a city renowned for its strong university presence and vibrant community activism, opposition to the tour manifested as a powerful wave of protests, civil disobedience, and political debate. This article explores the story of Dunedin's resistance during this turbulent period, illustrating how the community's actions reflected broader societal tensions and the enduring struggle for justice and human rights.

The Context of the 1981 Springbok Tour

South Africa and Apartheid

The Springbok Tour of 1981 came at a time when global awareness of apartheid—a system of institutionalized racial segregation and discrimination—was escalating. Many countries and organizations around the world had imposed economic sanctions and cultural boycotts against South Africa. In New Zealand, rugby was more than just a sport; it was a national identity. The decision to host the Springboks was met with mixed feelings—some saw it as a matter of sporting tradition, while others recognized it as tacit approval of apartheid policies.

Government Decision and Public Reaction

The New Zealand government, under Prime Minister Robert Muldoon, decided to proceed with the tour despite mounting opposition. This decision ignited widespread protests and debates about morality, patriotism, and international solidarity. Many citizens believed that hosting the Springboks was incompatible with New Zealand's emerging stance against racial injustice.

Dunedin's Unique Role in the Opposition

The Dunedin Community and the University of Otago

Dunedin, home to the University of Otago—the oldest university in New Zealand—was a hub of intellectual activism and youthful dissent. Students and academics played a central role in organizing protests, rallies, and acts of civil disobedience. The city's tight-knit community was deeply engaged in the national debate, with many locals feeling a moral obligation to oppose the tour.

Early Signs of Protest

As news of the tour's schedule spread, Dunedin saw an increase in public demonstrations. Students organized marches, distributing leaflets and holding speeches that highlighted the importance of standing against racial injustice. Local churches and community groups also voiced their opposition, framing the tour as a moral issue that transcended sport.

Major Events of Dunedin's Opposition

Disruptions During the Matches

The most notable protests occurred during the rugby matches themselves. Dunedin's Carisbrook Stadium, often called the "House of Pain" by rugby fans, became a battleground of sorts. Protesters attempted to block players from entering the field, and some engaged in acts of civil disobedience such as occupying the stadium or unfurling banners condemning apartheid.

Mass Demonstrations and Rallies

In the lead-up to and during the matches, mass demonstrations drew hundreds of supporters and opponents alike. These rallies often featured speeches from anti-apartheid activists, university students, and community leaders. The protests aimed to pressure the government and the rugby authorities to reconsider the tour.

Notable

Acts of Civil Disobedience Blockades: Activists attempted to block roads leading to the stadium. Sit-ins: Students and activists staged sit-ins at key locations to prevent the movement of rugby teams and officials. Symbolic Actions: Some protesters painted slogans on public buildings or used symbolic gestures, such as wearing black armbands or displaying banners, to draw attention to the cause. The Impact of Dunedin's Opposition Public and Government Response The protests in Dunedin, along with those in other parts of New Zealand, garnered significant media attention. While some viewed the protests as disruptive, many saw them as a necessary stand against injustice. The government faced pressure both domestically and internationally, sparking debates about the morality of hosting the Springboks. Legacy of Resistance Dunedin's opposition contributed to a broader national movement that questioned the role of sport in political and moral issues. The protests helped foster a culture of activism and demonstrated the power of community action in shaping public discourse. Long-term Effects on Rugby and Society Change in Public Attitudes: The protests shifted public opinion, leading to increased awareness of apartheid and its global implications. Sport and Politics: The events of 1981 intensified the debate over the politicization of sport, influencing future decisions about international sporting contacts. Civil Disobedience as a Tool: Dunedin's protests became exemplars of how civil disobedience can be used effectively to challenge unjust policies. The Winter of Discontent: The Story of Dunedin's Opposition to the 1981 Springbok Tour The 1981 Springbok Tour remains one of the most tumultuous and defining moments in New Zealand's social and political history. Central to this saga was the widespread opposition to the South African rugby team's visit amid the apartheid regime, culminating in protests, civil disobedience, and a national debate about morality, sport, and human rights. Among the many cities and communities affected, Dunedin's response stands out as a powerful example of grassroots activism and community

resilience during this period of upheaval. This article delves into the story of Dunedin's opposition to the Springbok tour, exploring the political climate, the forms of protest, the social impact, and the enduring legacy of that turbulent winter.

The Context: South Africa, Apartheid, and the Global Response

South Africa's Apartheid Regime and International Isolation

In the late 20th century, South Africa was deeply entrenched in apartheid—a state-sanctioned system of racial segregation and discrimination targeting non-white populations. The regime's policies faced increasing condemnation worldwide, leading to economic sanctions, cultural boycotts, and diplomatic isolation. International sporting bodies, governments, and civil society groups called for boycotts of South African sports teams to protest apartheid policies.

The 1981 Springbok Tour: A Controversial Event

In 1981, the South African national rugby team, the Springboks, embarked on a tour of New Zealand—a country where rugby was more than a sport; it was a national identity. The tour ignited fierce debates over whether sporting contacts should be maintained with South Africa amidst its apartheid policies. Protesters argued that allowing the Springboks to play in New Zealand tacitly endorsed apartheid, while supporters believed in the importance of sporting ties and national pride. The government initially permitted the tour, but mounting protests and civil disobedience forced a series of confrontations across the country, including in Dunedin. The tour became a symbol of the moral dilemma faced by New Zealanders—whether to engage with or oppose South Africa's apartheid regime.

Historical Background of Dunedin's Political and Social Climate

Dunedin: A City with a Rich Heritage of Activism

Dunedin, New Zealand's second-largest city during the early 20th century, has historically been a hub for progressive thought, labor activism, and social justice movements. Home to the University of Otago and a strong student presence, Dunedin fostered an environment receptive to political debate and activism. Throughout the 1970s and early 1980s, Dunedin's community was engaged in various social causes, including anti-war protests, nuclear disarmament campaigns, and workers' rights. This background created fertile ground for opposition to the Springbok tour, with many students, union members, and community groups mobilizing against what they saw as a morally unjustifiable event.

Community Divisions and Public Sentiment

While a significant segment of Dunedin's population opposed the tour, there were also defenders who viewed rugby as a unifying national sport, and some local officials who prioritized maintaining the tour for economic or diplomatic reasons. This division reflected broader national debates, making Dunedin a microcosm of New Zealand's complex feelings about the Springbok visit.

The Opposition: Forms of Protest and Civil Disobedience

Organized Protests and Demonstrations

From the outset, Dunedin saw a wave of organized protests aimed at discouraging the Springboks' matches. Student groups from the University of Otago played a leading role, organizing rallies, marches, and sit-ins. These protests often drew large crowds, emphasizing solidarity with anti-apartheid movements and emphasizing the moral stance against apartheid. Key events included:

- Public rallies calling for the cancellation of matches.
- Marches through the city streets, often culminating in speeches and community discussions.
- Distribution of leaflets and educational campaigns to raise awareness about apartheid and the implications of sporting links with South Africa.

Civil Disobedience and Direct Action

Beyond peaceful protests, many Dunedin residents engaged in civil disobedience to hinder the Springboks' tour. Tactics included:

- Blockades of rugby grounds, preventing matches from taking place.
- Occupations of stadiums and key infrastructure to disrupt

scheduled games. Sabotage and interference with tour-related activities, though these were less common. Students and activists often faced police intervention, leading to arrests and confrontations that garnered media attention and heightened tensions.

The Role of Student Movements and Local Organizations

The student unions and local activist groups played a pivotal role in orchestrating resistance. The Otago University Students' Association, for example, organized protests, sit-ins, and educational events. Local churches, trade unions, and community groups also lent support, framing opposition to the tour as a moral imperative rooted in justice and human rights.

The Social and Cultural Impact of the Protests

Media Coverage and Public Opinion

The Dunedin protests received extensive media coverage, both nationally and internationally. Images of students and community members blocking roads or occupying stadiums became symbolic of the broader anti-apartheid movement. Public opinion remained divided, with some viewing the protests as patriotic and morally justified, while others criticized them as disruptive or unpatriotic. The media's framing influenced public discourse, prompting debates about the role of sport in politics, the limits of civil disobedience, and New Zealand's moral stance on apartheid.

Impact on Rugby and Sports Culture

The protests significantly affected Dunedin's rugby culture. Some matches were canceled or relocated, and the overall atmosphere around the sport became tense and politicized. The tour's disruptions led to a reevaluation of the relationship between sport and politics in New Zealand, contributing to a growing awareness of the importance of ethical considerations in sporting relations.

Community Divisions and Personal Stories

The opposition to the Springbok tour in Dunedin also revealed personal and community divisions. Families, friends, and colleagues often found themselves on opposing sides of the debate. Personal stories of activism, sacrifice, and conflict highlighted the human dimension of the protest movement. Many young people, particularly students, viewed participation as a moral duty, while some older residents saw the protests as disruptive to national unity. These narratives continue to resonate as part of Dunedin's historical memory.

Aftermath and Legacy of the 1981 Springbok Tour in Dunedin

Political and Social Consequences

The protests in Dunedin, along with those nationwide, contributed to a significant shift in New Zealand's political landscape. The tour's opposition galvanized anti-apartheid activism, leading to increased awareness and support for economic sanctions and diplomatic isolation of South Africa. The government faced mounting pressure and public outcry, which eventually contributed to the decision to cease future sporting contacts with South Africa in the mid-1980s.

Long-term Cultural Impact

Dunedin's opposition to the Springbok tour fostered a legacy of activism rooted in principles of social justice. Memorials, murals, and oral histories commemorate the protests, serving as reminders of the importance of standing up against injustice. The event also contributed to the development of a more socially conscious sporting ethos in New Zealand, emphasizing that sport can be a platform for moral and political expression.

Reflection on the "Winter of Discontent"

The term "Winter of Discontent," borrowed from British history, aptly describes the period of turmoil and activism during the Springbok tour. Dunedin's resistance exemplifies how communities can mobilize in times of moral crisis, transforming dissent into a catalyst for social change. The protests in Dunedin symbolize a collective moral awakening, demonstrating that sport, politics, and human rights are inextricably linked. The legacy endures as a testament to the power of grassroots activism in shaping national identity and moral

conscience. Conclusion: A Lasting Legacy of Resistance The story of Dunedin's opposition to the 1981 Springbok Tour is more than a chapter in rugby history; it is a narrative of moral courage, community activism, and social conscience. The protests and civil disobedience during that winter period exemplified how ordinary citizens can challenge injustice and influence national policy. Today, the events serve as a reminder of the importance of standing up for human rights and the enduring power of collective action. Dunedin's "Winter of Discontent" remains a defining moment in New Zealand's history—a testament to the nation's capacity for moral reflection and change, even amidst the most heated debates and turbulent times.
